Profile

As a freelance system administrator with over 10 years of professional experience, I help companies operate their Microsoft and enterprise infrastructures in a stable, secure, and future-ready way. I support organizations where systems are business-critical and clean, reliable solutions are required - from Exchange environments and PowerShell automation to virtualization and IT security. I work in a structured manner, communicate clearly, and aim to make IT not just functional, but truly dependable.

Expertise

Freelance IT Consultant

01/2024 - present

- Migration to Exchange 2019 to prepare for an Exchange Hybrid environment
- Implementation of Exchange Hybrid to improve collaboration
- Automation of update processes to reduce error susceptibility
- Automation of operational processes to increase productivity
- Setup of a production-like test and development environment to establish staging capabilities
- Implementation of an application environment to standardize on-, off-boarding, and operational processes
- Integration of a central mail appliance for generalized and streamlined mail flows

IT System Administrator

09/2021 - 12/2023

- Build-out and migration of the email infrastructure to improve collaboration
- Design and implementation of new data center locations
- Gradual migration of existing IT services to increase resilience, availability, and system lifecycle

Achievements

2021 - 2023

Commissioning of operationally redundant and, among other things, highly available data center infrastructures

2024 - 2026

Standardization of update processes
Automation and standardization of operational tasks

Projects

ENZCOM GmbH
07/2024 - present

Freelance IT System Administrator

- Engineering, design, and operation of the Microsoft Exchange infrastructure
- Planning, implementation, and administration of Exchange Hybrid and Exchange Online environments
- Preparation, planning, and execution of Exchange product updates
- Exchange automation (PowerShell)
- Engineering, design, and operation of the mail service (mail gateway & encryption gateway)
- Analysis and resolution of issues within the supported infrastructures
- Implementation of an application environment to standardize on-, off-boarding, and operational processes
- Implementation of a central email gateway solution using Cisco ESA and SEPPmail to standardize mail handling and enable advanced email security features

Ratiodata SE
11/2024 - present

Freelance IT Consultant

- Client security (EgoSecure by Matrix42)
- Server administration (Windows Server 2019 & 2022)
- Windows Failover Clustering (file services)
- Microsoft Active Directory (ADFS, DNS, AD DS, AADC, GPO)
- Virtual desktop environment & virtual desktop infrastructure (Windows Terminal Server, Windows 10, VMware Horizon)
- Monitoring (Checkmk)
- Virtualization (vCenter & vSphere)
- Software & operating system lifecycle management

Ratiodata SE
01/2024 - 08/2024

Freelance IT System Administrator

- Client security (EgoSecure by Matrix42)
- Server administration (Windows Server 2019 & 2022)
- Windows Failover Clustering (file services)
- Microsoft Exchange 2019
- Load balancing (F5 BIG-IP)
- Mail archiving (MailStore)
- Microsoft Active Directory (ADFS, DNS, AD DS, AADC, GPO)
- Virtual desktop environment & virtual desktop infrastructure (Windows Terminal Server, Windows 10, VMware Horizon)
- Monitoring (Checkmk)
- Virtualization (vCenter & vSphere)
- Software & operating system lifecycle management
- Leadership of multiple infrastructure projects (test, development, and application environments)
- End-to-end responsibility from planning and implementation to migration
- Implementation of security requirements in accordance with BSI and NIS2
- Migration of existing data, applications, and processes

Projects

Ratiodata SE
09/2021 - 12/2023

IT System Administrator

- Windows Server 2019, 2022, failover clustering (file services)
- Print service (RICOH Streamline)
- Microsoft Active Directory (ADFS, DNS, AD DS, AADC, GPO)
- Virtual desktop environment & virtual desktop infrastructure (Windows Terminal Server, Windows 10, VMware Horizon)
- Setup of a monitoring solution (Checkmk)
- Architecture and integration of the virtualization solution (VMware)
- Setup and operation of the backup service (Veeam, HPE StoreOnce)
- Planning and implementation of Microsoft Exchange 2019, MailStore, F5 BIG-IP LTM incl. Migration of Lotus Notus data
- Migration and high-availability concepts for file, print, AD, and SQL services
- Transformation VDI environment (Citrix → VMware Horizon)
- Introduction, integration, and operation of security and endpoint protection solutions (MECM, EgoSecure by Matrix42)

EXEC IT Solutions
05/2021 - 07/2021

IT System Administrator

- Administration of Linux and Windows servers
- Administration of the virtualization environment (ESXi)
- Exchange 2016 environment, DHCP and DNS management, print management, GPO management
- Process optimization
- Implementation of security concepts and standards
- Troubleshooting of server and client environments at 2nd and 3rd level support

CompuGroup Medical
SE Co. & KGaA
01/2019 - 04/2021

IT System Administrator

- Administration of Linux and Windows servers
- Operational management of the virtualization environment (ESXi, Hyper-V, OpenStack)
- Administration of Exchange 2010 and 2016
- DHCP and DNS management
- Print management
- Monitoring and optimization of the monitoring solution
- Process optimization
- PowerShell automation (modules and scripting)
- Internal and public DNS management
- Puppet administration
- Troubleshooting of Windows clients at 2nd and 3rd level support
- Administration of legacy telephony solutions
- Planning and migration of outdated Windows servers (~900 systems)
- Planning and migration of outdated Linux servers (~800 systems)

2012 - 2018

Apprenticeship & System Administration

- Apprenticeship as IT Specialist for System Integration (2012–2015)
- Early responsibility in operating Windows and Linux servers
- Administration of Exchange (2010/2016), Active Directory, DNS, DHCP
- Virtualization (ESXi, Hyper-V), monitoring, backup
- Introduction to PowerShell automation and enterprise support
